Project Design phase-1

Solution Architecture

Date	21 October 2022
Team ID	PNT2022TMID28777
Project Name	Intelligent Vehicle Damage Assessment and Cost Estimator for Insurance Companies
Maximum Marks	4

Solution Architecture Diagram:
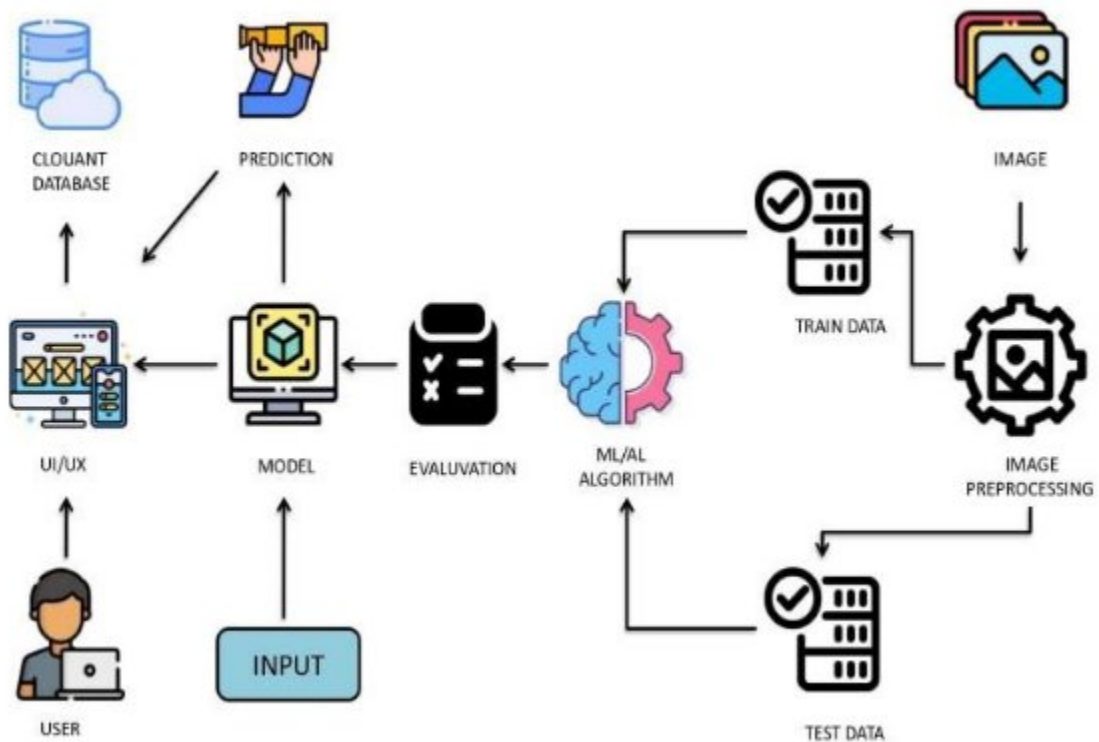

Technologies used for Intelligent Vehicle Damage Assessment and Cost Estimator for Insurance Companies:

● ● Working with Image processing technique

● ● Working in Trained CNN model

● ● Working in Deep Learning

● ● Using Python Programming

● ● Build web application using Python Flask

Platform

● ● Git & GitHub - Project Management

● ● IBM Cloud - Hosting

● ● IBM Watson - Training the Deep Learning Model
